*conserve energy and improve
the quality of our environment*

Cooling Equipment Program

Energy-efficient cooling equipment benefits all Barron Electric Cooperative members and our system by conserving energy and improving the quality of our environment.

An energy-efficient cooling system will cost less to operate and maintain. Barron Electric's central air program features incentives that help offset the cost associated with purchasing energy-efficient cooling equipment and shorten the payback for these investments.

Central Air Monthly Credit

Barron Electric members will receive a \$10 credit on their electric bill annually for the months of June, July, and August, when participating in the load management program for central air conditioning units.

Load Management Program

A radio receiver will be installed free of charge near the central air unit. The receiver conserves electricity by shutting off the AC unit during times of peak demand. The load control strategy will cycle the AC unit 15 minutes on and off during peak demand times (*no longer than 5 hours, unless there is a peak alert or system emergency*).

Incentive Program for Purchases

The following incentives are available:

Central Air(14 SEER+ or 11 EER)	\$40 per ton
Central Air(15 SEER+ or 12 EER)	\$60 per ton
Central Air(16 SEER+ or 13 EER)	\$80 per ton
Air Source Heat Pump(14 SEER+)	\$120 per ton
Geothermal Heat Pump	\$200 per ton
Commercial A/C and PTACs(11 EER+)	\$40 per ton
Conditions apply.	

Terms and Conditions

- Complete the form on reverse side.
- Member must meet credit requirement. If credit requirement is not met, members can sign up for automatic payment plan to qualify.
- Products must be purchased in 2010.
- Ground source heat pumps and split systems do not qualify for the \$10 monthly credit.
- The unit must be 240-volt direct-wired and have a means of disconnection.
- The central air conditioning unit will be metered on the regular rate.
- Radio receiver must be installed prior to receiving credit and available for inspection upon the Cooperative's request.
- Barron Electric reserves the right to deny or limit any rebate/incentive.
- Rebates/incentives are limited to the available funds and may be discounted before the end of the program period at the sole discretion of the cooperative.
- Program expires 12-15-2010.
