

Wind & Solar Renewable Energy Program

Member-owned renewable energy, such as wind or solar, may provide members with greater reliability, improved environmental performance and economic savings. Barron Electric offers up to a \$200 rebate for a wind or solar site assessment performed by a certified assessor. An interconnection agreement, application, and state electrical inspection are required prior to installation to ensure a safe system. If you are interested in installing a renewable energy facility at your home, contact the Member Services Department for more details.
